Examiner's signature, if required

Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Examiner noted indefinite language in the claims, which Applicant will correct in the next response. Examiner noted that the subject matter of claim 2 may define over Hahn, since it refers to channels extending all the way through the layer to the interface of the implant while Hahn discloses that there is substantially no porosity at the layer/implant interface. However, further search and consideration is necessary regarding this point, as well as to identify other art that discloses the invention.
